

DOGE LIFE

BEYOND THE STARS

EVERY HOLD IS A VOYAGE TO THE STARS

DOGE LIFE WHITEPAPER

Version: 1.0

Theme: From Earth to Mars, From Meme to
Civilization

Prologue When Humanity Gazes Up at the Stars

The history of human civilization is one of incessant boundary-pushing—from caves to cities, from the oceans to the continents, from gazing upon the Moon from Earth to observing Mars from the Moon. Each such leap in civilization requires a shared symbol capable of bridging technology, capital, culture, and human emotion.

In the past, we possessed gold. Later, we possessed Bitcoin. And in this era, as digital civilization gradually takes shape, we are beginning to ponder: if a digital asset could represent not only value, but also a shared human emotion,

could it become a new kind of civilizational symbol bridging the physical and virtual worlds?

DOGE LIFE—Thus was born “Dog Life.” Dogs are among humanity’s most loyal companions; they follow us when we venture into the unknown, await us as we explore distant lands, and may ultimately become among the first life forms to accompany us as we set foot on new planets. Therefore, DOGE LIFE aspires to create more than just a token; it seeks to construct a long-term narrative encompassing humanity, life, the digital world, space civilization, and future value networks.

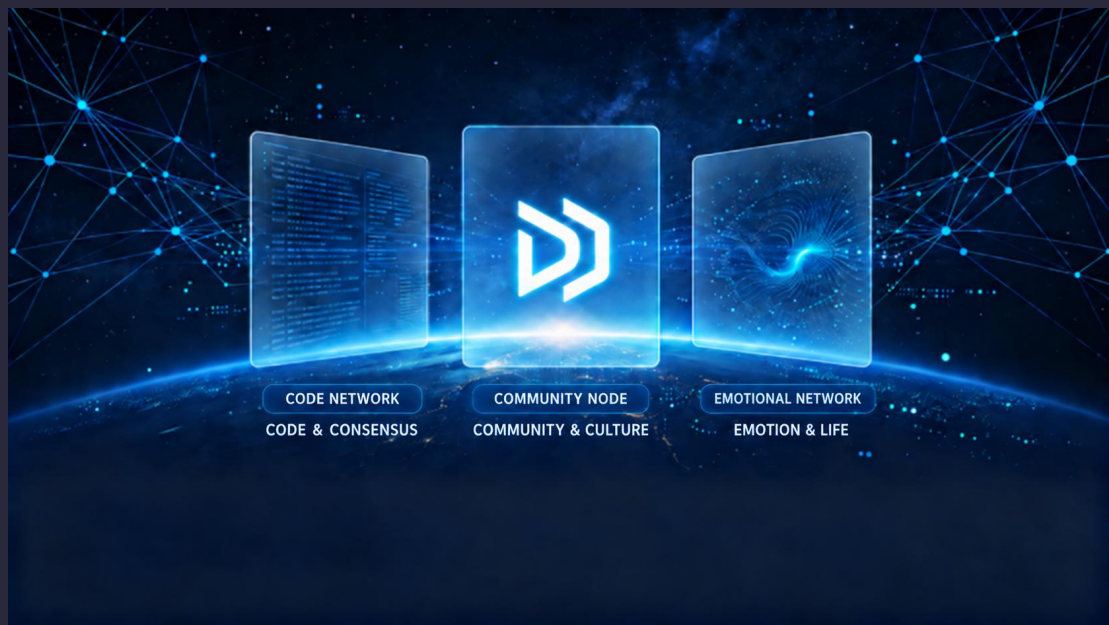

Chapter 1 Core Beliefs of DOGE LIFE

1.1 A Token With Life

Traditional digital assets typically emphasize four key attributes: code, scarcity, consensus, and financial properties. DOGE LIFE aims to introduce an additional dimension—emotional resonance—that has rarely been

highlighted in previous discussions. While Bitcoin embodies digital scarcity, DOGE represents internet culture and community spirit. DOGE LIFE seeks to integrate “Doge Culture + Community + Space + Human Emotion” into a new narrative of digital civilization. We believe that code without life cannot generate value; however, a story imbued with life can give rise to a culture that transcends eras. DOGE LIFE does not seek to replace existing digital assets; rather, it aspires to become a distinct entity within the digital world—one endowed with unique cultural vitality.

Chapter 2 DOGE LIFE x DOGE x Space

2.1 Doge Culture

The dog culture embodied by DOGE has become one of the most distinctive cultural symbols in the history of the internet. “Dog Life” further extends this culture: Dog → DOGE → DOGE LIFE → Space—evolving from internet culture to digital civilization, from Earth to the cosmos, and from meme culture to enduring narratives.

Chapter 3 Space Civilization Initiative

3.1 The Space Narrative

In the coming decades—or even longer—human exploration of the Moon, Mars, and outer space may emerge as one of the pivotal directions for cultural development. DOGE LIFE positions space as one of its most important long-term narratives. We envision that once humanity has truly established Earth-Moon economic systems, Mars bases, and interplanetary infrastructure, digital assets could serve as a crucial tool for connecting economic ecosystems across different planets. Within this vision, DOGE LIFE aims to become a symbolic digital value carrier bridging Earth and Mars.

Chapter 4 Vision for Future Space Fuel

4.1 The Fuel of Imagination

DOGE LIFE proposes a bold long-term concept: DOGE LIFE AS FUTURE SPACE FUEL

The term "fuel" here refers not only to conventional physical fuels, but also to a consensus fuel that will propel humanity toward the future. Within the long-term vision of this project, we aim to explore

- ❖ Integration of Digital Assets and the Aerospace Industry
- ❖ Web3 and the Future Space Economy
- ❖ Community Capital and Aerospace Technology Innovation
- ❖ Digital Identity and Interstellar Civilization
- ❖ The Virtual Economy and Real-World Infrastructure

Given the availability of technical capabilities, a supportive regulatory environment, and feasible commercial cooperation opportunities, further exploration of real-

world application scenarios related to the aerospace industry may be pursued in the future.

Therefore:

the first fuel for DOGE LIFE is imagination; the second fuel is community; the third fuel is technology. Ultimately, our goal is to create a value network that propels the advancement of civilization.

Chapter 5 DOGE LIFE x DOGE x Equity

5.1 The Closed-Loop Vision

Dog Life has proposed a long-term value ecosystem vision.

DOGE LIFE

DOGE Culture

Space Economy

Digital Asset Network

Future Civilization

Within its project vision, the company also aims to explore compliant linkage mechanisms among DOGE LIFE, DOGE, and corporate equity-related digital assets.

It should be clearly stated that any exchange of stocks, securities, or regulated financial products must be predicated on the applicable laws, regulatory permits, and compliant financial infrastructure. Dog Life aims to establish not merely a simple "price exchange," but rather a "VALUE LOOP."

Value creation

Community participation

Digital asset circulation

Real-world applications

Space economy narrative

Generation of new value and culture

Return to the community

Establish a long-term closed loop

Chapter 6 Space-Exclusive Tickets

6.1 The DOGE LIFE Space Pass

Every DOGE LIFE community participant who meets the project's eligibility criteria will have the opportunity to receive a DOGE LIFE SPACE PASS - an exclusive space-themed membership pass for DOGE LIFE. This pass is more than just a digital token; it embodies the principle: "You Belong to the Journey." 6.2 Ownership & Eligibility In the future, the project may utilize smart contracts to establish holding thresholds and eligibility mechanisms. Participants who fulfill specific DOGE LIFE holding requirements will be granted space-based identity credentials of corresponding tiers. For example:

✓ Explorer

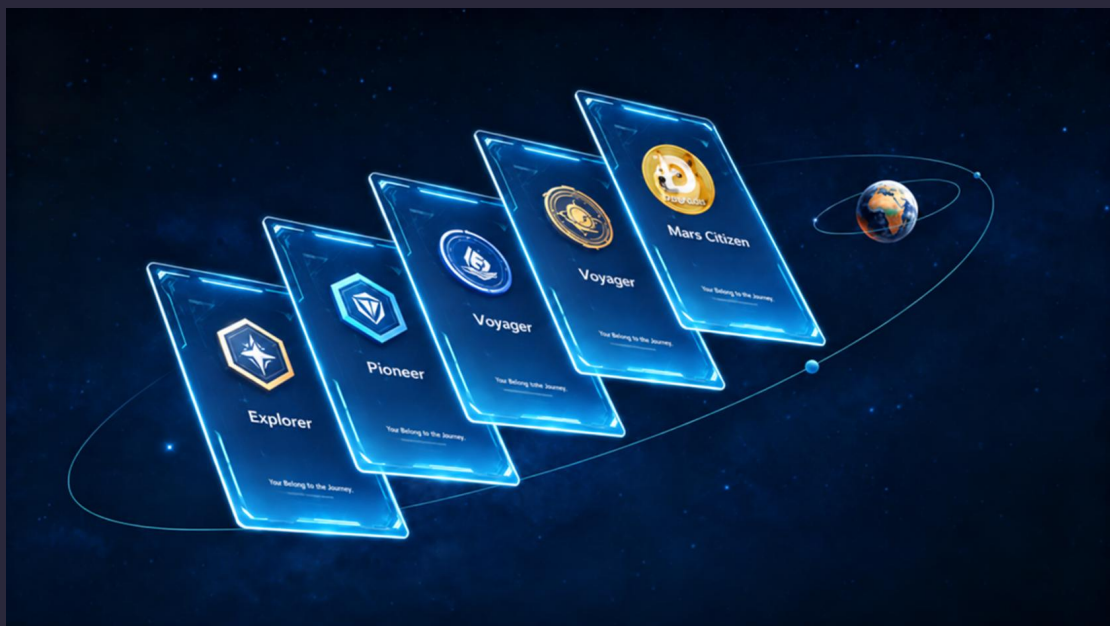

✓ Pioneer

✓ Voyager

✓ Mars Citizen

Different tiers correspond to distinct community benefits, commemorative items, digital identities, and future ecosystem rights. The specific thresholds, quantities, and associated benefits shall be determined by community governance mechanisms and formal regulations.

Chapter 7 Dogs and Humans Land in Space Together

7.1 The FirstAnimal

Dogs are among humanity's closest animal companions. In response, Doge Life has proposed a symbolic vision for our civilization: "When Humanity Goes to Mars, Dogs Go With Us"—that when humans set foot on Mars, dogs will follow them. Within this narrative, dogs become humanity's first animal companions in entering an interstellar civilizational era.

Other animals, in turn, will gradually integrate into new space ecosystems as technology, ecological systems, and life-support capabilities advance in the future. This is no mere animal story; it represents a reminder that in our exploration of the universe, we must not forget the lifeforms that have accompanied us throughout our long history.

Chapter 8 Mars Economy and DOGE LIFE

8.1 Mars Economy

Suppose that in the future, humanity establishes a Mars city in the true sense of the term.

- ❖ Mars Base
- ❖ Mars Transportation
- ❖ Mars Energy
- ❖ Mars Commerce
- ❖ Mars Digital Identity
- ❖ Mars Internet

A brand-new economic system—Earth-Mars Trade—will gradually take shape. At that point, the traditional concept of a “geographical currency” may need to adapt to a new interplanetary economic environment. DOGE LIFE proposes a long-term vision: DOGE LIFE AS MARS CURRENCY—a cultural value medium within the digital civilization of Mars. This is not a guarantee of future outcomes, but rather a long-term direction that the project aims to explore. If DOGE LIFE can truly become a digital value bridge between Earth and Mars in the future, its significance will extend far beyond that of today’s token.

Chapter 9 Beyond the Imagination of Gold

The value of gold stems from: scarcity + history + consensus. The value of Bitcoin stems from: digital scarcity + cryptography + network consensus. DOGE LIFE aims to explore a third form of value: LIFE + EMOTION + COMMUNITY. The cultural rationale behind DOGE LIFE is Bitcoin embodies scarcity. DOGE LIFE has its own story.

Bitcoin represents scarcity in the digital age, while DOGE LIFE aims to symbolize emotional connection in this same era. If humanity ever truly enters the "Mars era," the symbol "dog" could evolve from internet meme culture into a cultural memory—marking humanity's transition into a cosmic age.

Chapter 10 The Vitality of the Virtual World

10.1 Beyond Token

DOGE LIFE does not aspire to be merely a "Contract Address"; rather, it aims to become a "Culture Address" —a digital coordinate embodying the culture of its community, a digital symbol reflecting human emotions, and a digital asset representing the imagination of future civilization. Therefore,

DOGE LIFE IS NOT ONLY A TOKEN.

IT IS A STORY.

IT IS A COMMUNITY.

IT IS A VISION.

Chapter 11 DOGE LIFE Civilization Initiative

11.1 Phase I – Earth

Earth Phase

- Establish DOGE LIFE community infrastructure
- Token Ecosystem
- community governance
- Digital identity
- Space Pass
- Community Node
- Global Community Activities

Meme & CultureContent Ecosystem

Phase II – Orbit

Low Earth Orbit Phase

Explore

- Web3 x Space
- NFT x Space Pass
- Space commemorative assets
- Aerospace Cultural Cooperation
- Digital Identity Framework
- Space-themed community activities

Phase III – Moon

Moon phase

- ✧ Explore the establishment of
- ✧ DOGE LIFE Lunar Community
- ✧ Moon Community Concept
- Promote research on digital assets, digital identities, and the future space economy.

Phase IV – Mars

Mars Phase

- ◆ Final Long-Term Vision
- ◆ EARTH→MOON→MARS
- ◆ Dog Life aspires to become a digital cultural symbol within this historical narrative.

Explore

- Earth-Mars Digital Economy
- Mars Digital Identity
- Mars Community

- InterplanetaryValue Network
- DOGE LIFE Future Currency Concept

Chapter 12 DOGE LIFE Global Conference

12.1 DOGE LIFE GLOBAL SUMMIT

Future project plans include holding an event once per year.

DOGE LIFE GLOBAL SUMMIT

Global Dog Life Conference

Community members, developers, entrepreneurs, researchers, and Web3 participants from around the world are coming together to discuss.

Humanity x AI x Web3 x Space x Civilization

12.2 Top 100 Community Members

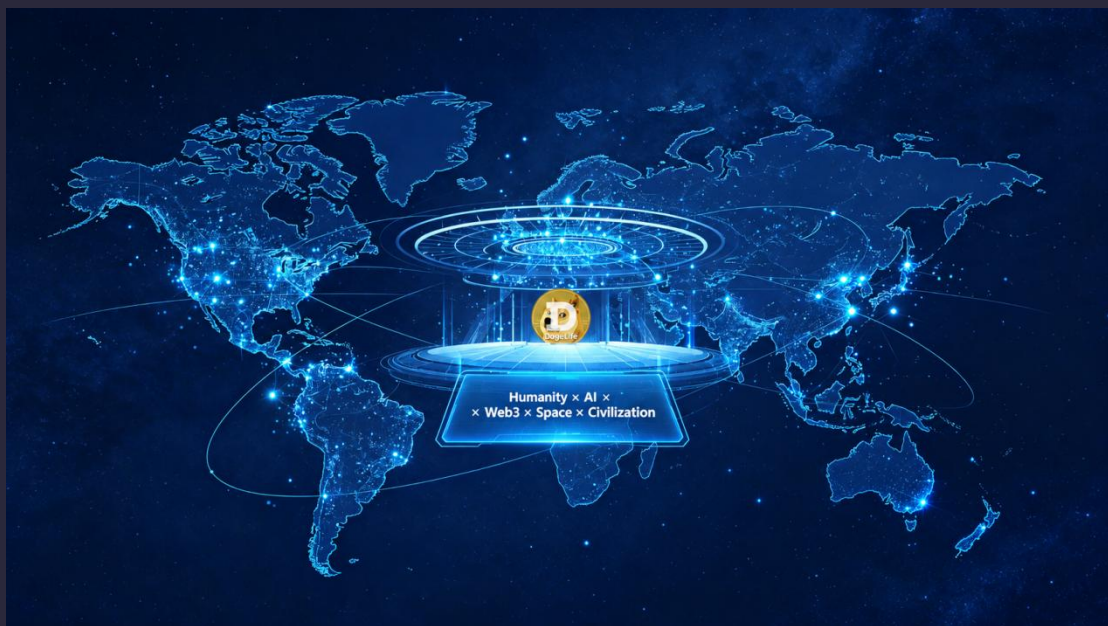

In accordance with the publicly disclosed and transparent rules of the project at that time

Holders or contributors among the top 100 in the DOGE LIFE

community are eligible for an invitation to the annual conference. The project team may, depending on the actual circumstances, cover part or all of the activity-related expenses.

The final eligibility criteria, ranking rules, fee ranges, and compliance requirements shall be subject to the official announcements issued at that time.

Chapter 13 Community Governance

The future of DOGE LIFE does not belong to any single individual; it belongs to the entire community. The project will explore the establishment of

- ✓ DAO Governance
- ✓ The community can participate.
- ✓ Ecological Proposal
- ✓ Community Activities

Space Pass Rules

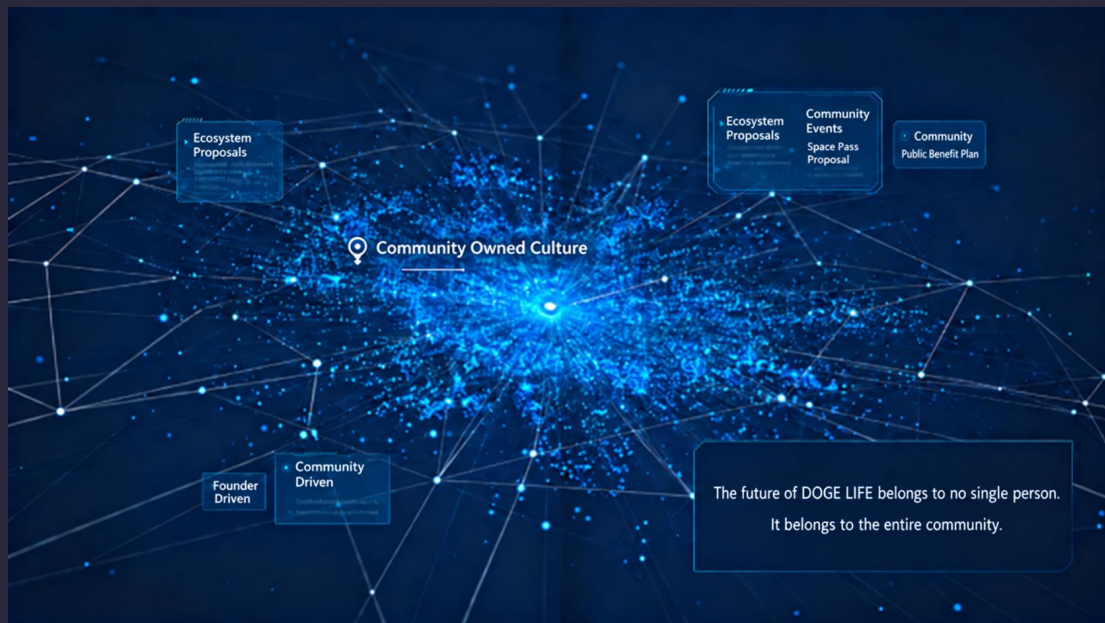

✧ Use of the Ecological Fund

✧ Public Welfare Initiative

✧ Space Culture Project

Global Conference Agenda

From: Founder-Driven → To: Community-Driven → Ultimately:
COMMUNITY OWNED CULTURE

Chapter 14 Life Public Welfare Initiative

The core philosophy of DOGE LIFE originates from dogs. Accordingly, the project plans to explore the establishment of the DOGE LIFE FOUNDATION to provide support.

- Stray Animal Rescue
- animal protection
- Research on the Relationship Between Humans and Animals

- Space Life Science Education
- Scientific Education for Adolescents
- Space Science Popularization
- Future Research in Life Sciences
- Enable digital assets to create positive real-world impacts.

Chapter 15 The Ultimate Vision of DOGE LIFE

We do not know when humanity will truly set foot on Mars. We do not know when a Martian economy will emerge. Nor can we predict what the world will look like a hundred years from now. But we can choose what to believe today. DOGE LIFE believes that humanity will ultimately continue to explore. DOGE LIFE believes that life will follow humanity to even farther reaches. DOGE LIFE believes that the digital world will eventually achieve deep integration with the physical world. DOGE LIFE further believes that what can truly transcend time is not only wealth, but also

culture and emotion.

EPILOGUE I: To future humans—perhaps a hundred years from now, when the first Mars city in the true sense of the word is established; when humanity stands for the first time on the horizon of Mars; when children look up at Earth from the transparent dome of that Martian city—they might ask: “What did it look like when humanity first began to dream of Mars?” At that time, perhaps no one would remember today’s prices, nor any particular day’s candlestick chart. Yet, people might still remember: there once was a group of people who, because of a dog, because of an emotion, because of their imagination of the universe, began to weave a story about a civilization of the future. The title of this story

DOGE LIFE

DOGE LIFE MANIFESTO

We don’tchase the past.

We build the future.

We don’tonly believe in value. We believe in meaning.

We don’tleave life behind.

We take our bestfriend with us. From Earth.

To Orbit.

To the Moon.

To Mars.

And Beyond. DOGE LIFE

The Doge Goes With Humanity.

The Story Goes With Civilization.

Disclaimer

This white paper primarily aims to outline the cultural philosophy, community vision, and long-term strategic direction of DOGE LIFE. The sections addressing future space fuels, the Mars economy, the Mars currency, the exchange of stocks or other financial assets, the United Nations General Assembly, and space applications constitute conceptual plans or long-term exploration directions; they do not constitute any commitment regarding future realization, asset value, investment returns, securities rights, or cooperation with any government or international organization. Any actual implementation involving securities, stocks, payments, exchanges, financial services, or cross-border activities shall be subject to the laws and regulations, regulatory requirements, formal agreements, and practical technical conditions in force at the time of such implementation.
